Accelerated market entry — with
comprehensive product development

Solid

design solutions

Making new products — reality

Your goal is getting to market — and when you need to get there faster, better, with solid product development and production solutions, our proven end-to-end development process can lead the way, with a rock-solid roadmap that mitigates risks while focusing resources on your project objectives.

Join the many industry leaders such as 3M, Medtronic, Ergotron, and Honeywell that turn to Solid to meet their product development needs.

a SOLID process

insight

Where others see problems, we see opportunities — recognized by experience.

creativity

A wealth of design and engineering experience is leveraged to create your product concepts.

innovation

We bring together best-in-class expertise for innovative solutions that change the market and inspire users.

expertise

Early research, informed conceptualization, thorough testing and prototype development.

PROTOTYPE

Getting to market faster

Whether your objective is to launch a new product or to update and enhance an existing one, Solid has the talent and resources you need, getting you there at market speed. We integrate exceptional creativity with best practices and a meticulous attention to detail, creating optimized products that meet the demands of your market and your supply chain.

Our continuous focus, transparent reporting, responsive follow-through and on-time, on-budget delivery mean you don't have to guess about success.

Full support for every phase

Whether your goal is a consumer, industrial, laboratory, law enforcement, or medical product, our approach assures a successful outcome.

You'll accelerate market entry and reduce costs, and enjoy full engineering support from early research, conceptualization, and user-centric design through to prototype testing, pilot production, and manufacturing set-up. And with our specialty machine subdivision, we can provide cost-effective testing and assembly fixtures as well as production automation.

With Solid, you go all the way – from imagination to reality!

integration

No opportunity is missed for leveraging technology to make your product the most advanced in its class.

teamwork

You are fully supported through fixture and tool build with our turnkey approach that doesn't leave you hanging.

support

Complete coordination of production startup activities, including tooling, global sourcing and process development.

reality

Go to market – on-time, on-budget.
